COMPANY PROFILE

Structural • Architectural • Civil

Established 2020

ABOUT COMPANY

Engineering discipline, applied to every stage of construction

Kimtush Engineering Limited is a Nairobi-based structural, architectural and civil engineering firm, co-founded in 2020 by Godfrey Mutuma and Robert Kimathi Murithi.

We work directly with homeowners, developers and contractors across Nairobi and beyond, taking projects from first concept through design, costing, construction and handover.

Our practice is built on sound engineering fundamentals. Every drawing we produce, every material take-off we prepare, and every quotation we issue follows recognized Kenyan cost estimation and construction standards.

From high-end residential homes in Karen and Syokimau to multi-storey apartment developments, church buildings, commercial godowns and affordable housing schemes, Kimtush Engineering provides one point of accountability.

DIRECTOR'S STATEMENT

A commitment to sound engineering and accountable delivery.

At Kimtush Engineering Limited, we believe successful construction begins with disciplined planning, sound engineering judgement and clear communication. Our work is built around helping homeowners, developers and contractors move confidently from concept to design, costing, construction and handover. Since our establishment in 2020, we have developed a practical, client-focused approach across residential, commercial and institutional projects. We place particular emphasis on technical accuracy, transparent pricing, safety, quality and direct communication throughout the project life cycle. Our objective is simple: deliver work that is structurally sound, properly costed, carefully supervised and built to serve its intended purpose for years to come.

MISSION

To deliver structurally sound, well-costed and beautifully designed buildings by combining rigorous engineering practice with honest, transparent client communication at every stage of a project.

VISION

To be Kenya's most trusted engineering partner for homeowners and developers-recognized for the accuracy of our work, the integrity of our pricing, and the quality of what we build.

CORE VALUES

- Integrity
- Technical Excellence
- Safety
- Accountability
- Transparency
- Client Focus

of construction

WHY CLIENTS CHOOSE US

TECHNICAL ACCURACY

Every quotation and drawing follows recognized Kenyan cost estimation practice, so figures are designed to hold up on site.

TRANSPARENT PRICING

Itemized quotations with materials, labour and VAT clearly broken down, with a focus on avoiding surprises mid-project.
SAFETY FIRST

SAFETY FIRST

Site works are planned and supervised with safety and structural integrity as non-negotiables.

TIMELY DELIVERY

Realistic programmes and close site supervision keep projects moving toward schedule.

DIRECT COMMUNICATION

Clients deal directly with the engineers on their project, not a rotating cast of intermediaries.

FULL-SERVICE CAPABILITY

Design, costing, construction and renovation are handled under one firm and one point of accountability.

OUR SERVICES

ARCHITECTURAL DESIGN

Concept-to-working drawings that balance aesthetics, function and buildability.

STRUCTURAL ENGINEERING

Our structural engineering work is focused on developing practical structural solutions that support safety, durability and construct-ability across residential and commercial building projects.

CIVIL ENGINEERING WORKS

Kimtush Engineering provides civil engineering support for roads, drainage, foundations and related site works, integrating site requirements with the wider building project.

BUILDING CONSTRUCTION

Our building construction service provides full-scale construction management and delivery support, with emphasis on workmanship, coordination, safety and progress.

PROJECT MANAGEMENT

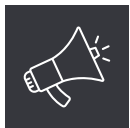

We coordinate project activities to maintain clarity between design, procurement, labour, site operations and client decisions.

ADDITIONAL SERVICES

COST ESTIMATION & QUANTITY TAKE-OFFS

We prepare material take-offs and quotations to help clients understand project quantities and expected construction costs before work proceeds.

RENOVATIONS & MAINTENANCE

Our renovation and maintenance work addresses repairs, upgrades and rectification requirements across residential and commercial environments.

***Our goal is to
make
construction
clearer,
more
accountable
and better
engineered.***

HEALTH, SAFETY, QUALITY & ENVIRONMENT

01

QUALITY

Engineering decisions, material quantities and site activities are approached with attention to technical accuracy and workmanship.

02

SAFETY

Site works are planned and supervised with safety as a core project consideration.

03

ENVIRONMENT & RESPONSIBLE DELIVERY

Construction decisions are coordinated with practical site requirements and responsible project execution

”

Safety and structural integrity
are treated as non-negotiables
in our project approach.

OUR CONSTRUCTION PROCESS

A clear route from idea to completed project

01

CONSULTATION

Understand the client's needs, scope and project objectives.

02

SITE VISIT

Review site conditions and project requirements.

03

DESIGN

Develop coordinated architectural, structural and civil solutions.

04

COSTING

Prepare quantities, material requirements and itemized costs.

05

CONSTRUCTION

Coordinate works with focus on workmanship, safety and progress.

06

SUPERVISION &
HANDOVER

Monitor delivery and coordinate completion and handover.

”

Engineering discipline,
applied to every stage
of construction

LET'S BUILD BETTER!

We welcome the opportunity to discuss your next project.
